MAMIT FRONTEND SUB-TRACK FINAL TASK

Final Task: Mamit Todo App with HTML,CSS & JavaScript.

Assalamu'alaykum, trust we've all been good. As a round up for the MAMIT Frontend

SubTrack division, you're required to build a todo app using your previous knowledge and

experience of **HTML**, **CSS**, and **JavaScript**.

Design: https://www.figma.com/file/Hl2C4lOFXQ4bc8bTcwdIDN/Untitled?node-id=0%3A1

Features:

1. Be able to add todo items using the input field and add button.

2. Be able to delete any of the todo items by clicking on the respective delete icon..

3. On clicking on the todo text, it should mark the checkbox.

Submission Guidelines:

1. Create a Github repository and push your code to the repository. Hint.

2. Create a netlify account and deploy your code fron Github. Hint

3. With the deployed link with you, kindly fill in this submission form

Jazaakumullaahu khayran.
